FUENTE

NOTAS

* La fórmula que se presenta es por edad simple. Para calcular el indicador por grupo de edad se utiliza:

$$\frac{\sum_{e \in I} A_{gn_{inf}}^e}{\sum_{e \in I} P_e} \times 100, \text{ donde } I=4-5, 6-11, 12-14 \text{ y } 15-17.$$

DEFINICIÓN

Número de personas que se encuentran matriculadas en un grado inferior al que le corresponde normativamente por su edad, por cada cien en la población de referencia.

INTERPRETACIÓN

Idealmente el indicador toma valores entre cero y 100; proporciona una medida de los alumnos cuyo avance escolar se encuentra ligeramente debajo de la trayectoria hipotética determinada por los grados normativos. Es una medida del retraso de las cohortes en relación con un avance escolar ideal. En general, puede considerarse tolerable aunque entraña una situación de riesgo que de profundizarse puede ser incentivo para el abandono escolar.

UTILIDAD

Es un indicador que nos permite conocer el porcentaje de la matrícula que se encuentra en una situación de rezago en apenas un grado y a su vez alerta sobre una situación que de agravarse puede dar lugar al abandono escolar.

REFERENTES DE EVALUACIÓN

Idealmente la población debe tener mantener una trayectoria normativa en educación básica por lo que el referente de este indicador es igual a 0%.
